SUMMARY

I'm a Full Stack Developer student excited to start my career in tech after 5+ years in the healthcare sector. I'm excited to be able to put my skills to good use and to keep learning as a developer. I've really enjoyed doing my own projects and want to learn more to develop my skills even further. With my positive energy and team-player skills I would love to hear from you!

PORTFOLIO PROJECTS

Malmö Cycling Club - Using vanilla HTML, CSS and Github to create a website for a fictional cycling club in Malmö with it's own café. Using Figma for a mock-up design plan.

Rock Paper Scissor- Built my own game using vanilla HTML, CSS and JavaScript for an interactive game you play vs the computer.

Hangman - Build my own version of hangman using only python. Deployed to Heroku.

Bake me a cake - Built my first Full Stack project using vanilla HTML, CSS, JavaScript, Python and Django. Building a mock-up using Figma and following up the process with issues in Gitpod.

Coffee Shop - Final project for my Full-Stack Diploma. This is an e-commerce website for an online Coffee Shop. It's a full stack project with implementation of Stripe Payment. This app is deployed to Heroku and includes Cloudinary and ElephantSQL.
